Talent is equally distributed,
but **opportunity** is not

What is open source?

Something people can modify and share
because its design is publicly accessible

I went through the USPS list, wasn't sure how you want to handle countries listed in Drupal but not on USPS list (ex: Antarctica, Palestine). I'm sure I may have missed some since the lists are organized in two completely different manners, but nabbed quite a bit.

Commerce Guys Refocusing on Drupal Commerce as Platform.sh Becomes an Independent Company

Commerce Guys has long been a leader in the development of e-commerce websites using Drupal, with our flagship [Drupal Commerce](#) project running on over 60,000 sites. We are now releasing alphas of Commerce 2.x for Drupal 8 every two weeks, with alpha3 up next. Our first production ready beta is scheduled for end of March, but developers are already using our standalone libraries for [addressing](#) and [currency localization](#) in production. Written to support Commerce 2.x, these libraries gave us a chance to share our knowledge and experience with the broader PHP world.
